

MKS Ltd., Ljubljana, Slovenia

MKS Electronic Systems Ltd. specializes in telecare and telemedical solutions for frail and disabled people living at home. Its activities include aspects such as establishing telecare networks to provide telecare services, system integration and implementation of new technological solutions, R&D with a special emphasis on elderly people. MKS has participated in 2 EU projects ((Telescope (EAHC), BioModUE_PTL (EraSysBio+)) and 13 EU proposals within FP5, FP6, FP7 and AAL. Although MKS is an SME by nature, it contributes to national strategic policies addressing people with disabilities in Slovenia and standardisation processes. This expertise will be used to shape the Telescope project outputs.
